PORTFOLIO

CONTACT

During the last 10 years DIE FILMAGENTUR accumulated a broad scope of specialised knowledge by successfully concluding countless video productions. Both managing directors hold a degree in business communication by renowned schools and can therefore professionally guide and advise you during the conceptional phase.

The conceptional phase of an image-video is the most crucial and time-consuming. This stage determines the success of the final product. The image-video must convey a clear message. The core message should not just be stated, but conveyed in a way so it is credible. Whether this is achieved by convincing facts or through an inspiring story depends on the target audience's communication needs.

Once the core message has been determined, DIE FILMAGENTUR will select the appropriate means to communicate it. In accordance with this message, we suggest the genre, a structure, the type of staging and a selection of necessary images.

We set ourselves apart from the average production company by not only shooting exciting footage, but also paying attention to the bigger picture – your company's general goals.

PORTFOLIO

CONTACT

Vorproduktion

Konzeption

- In the first conversation (usually over the phone) we'll talk about your video's goal, topics and possible content as well as schedules and deadlines.
- In the next step we'll send you a quote you based on our first conversation.
- After a written confirmation on the quote we'll get into planning the production which includes pinning down the idea, creating a script, agreeing on shooting locations, actor, studios and necessary props and so on.

Produktion

Filmdreh

- We'll manage the entire production, for you. We will coordinate the team, handle the equipment and make sure all locations, interviewees and props are available at the right time.
- DIE FILMAGENTUR is well insured for the unlikely event of an accident.

Nachproduktion

Schnitt

- We will create a rough cut in which major scenes are lined up, the narrative text, interviews, possible animations appear only as placeholder. This way you can quickly develop a feeling for the product and possible issues can easily be solved without wasting costly editing time.
- With a list of amendments we'll continue to edit the video to its final form.
- After completion music, ambient sound, voice over and animation will be added and aligned with the edit.

DIE FILMAGENTUR produces motion-picture-content for some of the most renowned German companies in various industries.

Deutsche Bahn AG - Stuttgart 21

DIE FILMAGENTUR has been producing all motion-pictures for the communication department in Stuttgart since 2010. Next to two feature-length and several shorts covering topics like ground-water-management, financing, involvement of citizens, urban-planning a number of news videos were produced. The main purpose of those videos is to create understanding and appreciation for the project among local population.

These videos are distributed online, on DVD, at press conferences, during events, in exhibitions, during presentations and in universities. Because of the videos, the project is particularly intensely discussed on Facebook while receiving positive comments. [Link to the video](#)

Funkwerk: Professionelle Industriefilmproduktion

We produced this industrial video for the Funkwerk AG near Leipzig. DIE FILMAGENTUR came up with the basic idea and created the script showcasing the company's high-quality, diverse products. Train tracks, train stations, airports, landing strips and of course the company's headquarters were captured. The video's post-production was particularly complex as e.g. camera tracking and specially composed music was implemented. This video is not only available online, but also travels to trading fairs, product presentations and sales talks now.

Dresden Weihnachtsmarkt

Tourismusfilm zur Standortkommunikation

In recent years the use of motion-pictures as way of communication spread across all industries. One of the industries in which videos have been used for a long time is the marketing of tourism and locations. The reason is simple, nothing inspires more than images. Also, time-lapses and aerial footage are elements that are being used increasingly.

All of these aspects were used by DIE FILMAGENTUR for this image-video where a rather fictional story engages the audience, promoting the city Dresden. The video wins at the ITB 2015 in Berlin the award „Excellent“. [Link to the video](#)

United Nations – Opening Trailer

This trailer was screened at the inauguration ceremony at the UN-university (UNU FIORES) in Dresden. This video worked as an emotional introduction for the event. Its complex animations and unique music which illustrated each continent impressed the audience. [Link to the video](#)
